

Question:

Science Class 6

Weaving of fabric is done in

- 1 handlooms
- 2 power looms
- 3 both (a) and (b)
- 4 takli

Downloaded From: eLearn Pro (<https://myelearnpro.com/>)

Concept:

Handlooms are **manually operated** looms used for weaving in which picking and beating is done manually by human hands, whereas **powerlooms** are **mechanized** looms driven by **stem engines** or **electric power** in which shedding, picking and beating are done automatically rather than manually.
