

Question:**Numbers**

Two-third of a number is thirty less than the original number. The number is,

- 1 90
- 2 60
- 3 120
- 4 45

Downloaded From: eLearn Pro (<https://mylearnpro.com/>)

Explanation:

Let the original number is x. Then

$$(2/3)x = x - 30$$

$$\Rightarrow x(1 - 2/3) = 30$$

$$\Rightarrow x = 30$$
