

**Question:**

Chemistry

Generally, what is the colour of emerald ?

- 1 Violet
- 2 Yellow
- 3 Deep green
- 4 Prussian blue

*Downloaded From: eLearn Pro ( <https://myelearnpro.com/> )*

**Concept:**

The most desirable **emerald colors** are **bluish green to pure green**, with vivid color saturation and tone that's not too dark. The most-prized emeralds are highly transparent. Their color is evenly distributed, with no eye-visible color zoning.
