

Question:

Science Class 6

The process of conversion of water vapours into liquid is called

- 1 condensation
- 2 decantation
- 3 sedimentation
- 4 evaporation

Downloaded From: eLearn Pro (<https://myelearnpro.com/>)

Concept:

Condensation is the process through which the *physical state of matter changes from the gaseous phase into the liquid phase*. For example, **condensation** occurs when water vapour (gaseous form) in the air changes into liquid water when it comes in contact with a cooler surface.
