

Question:

Geography of India

In India, rain forests are found in:

- 1 Central India
- 2 Eastern Ghat
- 3 Northeast Himalayas and Western Ghats
- 4 Northwest Himalayas and Eastern Ghats

Downloaded From: eLearn Pro (<https://myelearnpro.com/>)

Explanation:

The three major rainforests in India lie mainly in the Andaman and Nicobar Islands, Western Ghats and the Northeast Himalayas. However, some smaller ones can even be found in remote locations like Odisha, Naga Hills Manipur, etc.
