Question:

Science Class 7

The eye of the potato plant is what

1. the root is to any plant
2. the bud is to a flower
3. the bud is to Bryophyllum leaf
4. the anther is to stamen

Downloaded From: eLearn Pro (https://myelearnpro.com/)

Concept:
The **eye of the potato** is the same as the **bud is to Bryophyllum** leaf. *Both the structures are vegetative propagules.* They can form a new plant from them.
This method of asexual reproduction through the vegetative parts of the existing plant is called **vegetative propagation.**
