

Question:

Science Class 6

The property which forms the basis of sieving

- 1 difference in weight
- 2 difference in colour
- 3 difference in shape
- 4 difference in size

Downloaded From: eLearn Pro (<https://myelearnpro.com/>)

Concept:**Sieving**

Sieving is a **process** by which fine particles are separated from bigger particles by using a **sieve**. It is used in flour mill or at construction sites. In flour mill, impurities like husks and stones are removed from wheat. Pebbles and stones are removed from sand by **sieving**.
