

Question:

Chemistry

Which is the purest form of iron ?

- 1 Steel
- 2 Cast iron
- 3 Pig iron
- 4 Wrought iron

Downloaded From: eLearn Pro (<https://myelearnpro.com/>)

Concept:

Wrought iron is an iron alloy with a very **low carbon content** (less than 0.08%) in contrast to that of cast iron (2.1% to 4%). It is a semi-fused mass of iron with fibrous slag inclusions (up to 2% by weight), which gives it a "grain" resembling wood that is visible when it is etched or bent to the point of failure.
