

Question:

Chemistry

The purest form of water is

- 1 tap water
- 2 rainwater
- 3 groundwater
- 4 distilled water

Downloaded From: eLearn Pro (<https://myelearnpro.com/>)

Concept:

Distilled water is pure form of water because there is not any dissolved content is 0 ppm (particle per million) and in **rainwater** it is also a **naturally distilled** water but while rainwater reaching to land some **pollution from environment** affect it which increase the impurities of it from 0 pm to 10 ppm .
