Question:

Biology

Fungi that grow on bark are said to be

1. Xylophilous
2. Saxicolous
3. Coprophilous
4. Corticolous

Downloaded From: eLearn Pro (https://myelearnpro.com/)

Concept:
A **corticolous lichen** is a lichen that grows on bark. This is contrasted with a lignicolous lichen that grows on wood that has had the bark stripped from it, and saxicolous lichens that grow on rock.
